# OUR ACTIVITIES

## TRADING & SUPPLY

### ICE MELTING COMPOUND ( $\text{CaCl}_2$ )

Calcium chloride ice melt is becoming increasingly popular in the de-icing field as well as its many other applications. The reasons for its de-icing popularity include its high performance even in lower temperatures, its effectiveness even in small doses, and its eco-friendliness. Once calcium chloride gets in contact with ice and snow, it forms brine that quickly melts whatever it comes in contact with.

### CAUSTIC SODA ( $\text{NaOH}$ )

Caustic Soda (Sodium Hydroxide) is a highly corrosive, odorless, non-flammable white solid. It is usually produced as shiny pellets or flakes, which are highly water-soluble, making a slippery solution. The 50% solution is slightly viscous. Caustic Soda is a general purpose industrial chemical used extensively by process industries.

# OUR ACTIVITIES

TRADING & SUPPLY

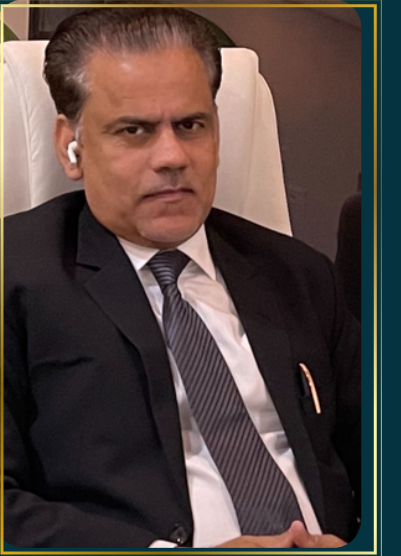

## ELECTRO MECHANICAL EQUIPMENTS & PARTS

Associated with renowned manufacturers across North America, Europe and Asia for supply of Electro Mechanical equipments and parts.
